

SIMPLY CLEVER

The new **Škoda**Fabia Combi

We all have our to-do lists. Meeting friends, grocery shopping, dropping kids off at school, picking them up after the match. There's a lot on everyone's to-do list. But when the faces look familiar, the roads are well known and the neighbourhood feels like home, the same chores can be a lot more fun.

design

Take a minute to get inspired. Paint the walls white. Or maybe green. Rearrange the furniture. Then rearrange it again. Trim the hedge. Maybe plant some tulips. Go to the art exhibition. Get a haircut. Or better still, get a makeover. And if you're still looking for inspiration, just look at your Fabia Combi.

1.

2.

3.

4.

"A smart and dynamic look"

Like its principal outlines, all the exterior details of the Fabia Combi are distinguished by their unmistakable form.

1. The shape of the roof and the side windows give the car its streamlined look, rendering it more dynamic along with the dark columns. **SunSet – windows with a higher density of tint in the rear of the vehicle** enhance the elegance of the Fabia Combi while protecting rear seat passengers from solar radiation.

2. The headlamps carry a distinct look, contributing to the friendly face of the car.

The fog lamps fit perfectly in the neat contours of the front bumper and can be further equipped with the "Corner" functionality (see page 14).

3. The rear combined lights with their typical "C" shape illumination bear the uniqueness of a Škoda car. They partially wrap onto the sides, thus adding to the aesthetic appeal of the car and making it recognisable from afar.

4. The front grille is based on the traditional design, complete with the vertical bars and Škoda logo. Thus, like all Škoda models currently in production, the Fabia Combi also feels part of the proud family. The result is a friendly-looking front panel bearing an expression that resembles a smile.

technology

Try some cool tools. Get a flat screen TV, but have the same old fight over the remote. Copy the new album to your iPod. Drive down to the ATM. Take the kids to the 3D cinema. Take their pictures with your phone then send them to mum. Email your friends. Or maybe call them instead. And to see how technology really comes alive, take a drive in your Fabia Combi.

“New technological possibilities”

We have done our best to make sure you won't have to part with your favourite technological companions, such as your iPod, even while driving.

1. The High-line instrument panel is one of the top items in our extra equipment offer for the new Fabia Combi. It features 4 analogue indicators, 19 indicator lights, segment display (distance travelled, time) and a large MaxiDOT display showing data from the on-board computer, information from the tuner and the navigation

system. Along with its many features, the device is easy to use and read.

2. The control module beneath the steering wheel will make it easier for you to control the main functions of the radio and mobile phone. The module can be reached easily with the left-hand fingers, without distracting the driver's attention.

3. The phone preparation GSM is available in both traditional wired and wireless Bluetooth

versions. Mobile phone adapters are included in the Škoda Genuine Accessories.

4. The navigation system with a tuner and a CD player will lead you to your destination by means of both visual and verbal instructions. The information is shown both on the instrument screen and the MaxiDOT display in the driver's field of vision. The navigation system can even receive traffic information. Those who prefer portable navigation devices can get the ViaMichelin navigation system, which is available

as a part of the Škoda Genuine Accessories range (see page 29).

5. An audio jack is available with every Dance or Beat radio. Thanks to this highly functional technological detail, you can use your iPod, CD or MP3 player, walkman, DVD player or PDA in your car.

6. The automatic transmission, designed for the highest-performance petrol engine version 1.6 16V/77 kW, has six gears with the Tiptronic manual gear changing option.

7. The 1.6 16V/77 kW petrol engine grants the Combi optimum power and dynamics even when fully laden. Drivers who prefer a more economical performance may choose between the 51 kW or 63 kW engines.

8. The offer includes three diesel engine versions, ranging in performance output between 51 kW and 77 kW. All the engines are very economical, regardless of their capacities and output. The 59 kW and 77 kW versions are also offered with a Diesel Particulate Filter.

You can use the neck strap, featuring a decorative printed design and matt noble steel details, to carry your keys or a mobile phone.

For fans of the Fabia Combi there are 1 : 43 and 1 : 72 scale models available in 13 different colour finishes.

safety

Make sure everything is fine. Learn rollerblading at the nearby park. Order your favourite meal at your favourite restaurant. Say hi to the new neighbours. Fix your roof. Give a hug to your family. Drive to the corner shop for groceries. They're even open on weekends. And on days when you need to feel a little more secure, hop inside your Fabia Combi.

“Tried and tested safety elements”

Each of us feels safe in different environments, which is why you have the option of supplementing the car's standard safety equipment according to your needs.

1. The rear window wiper with washer will help you maintain one of the principal prerequisites for safe driving – a good view from the car.

2. The VIN plate (Vehicle Identification Number) with a bar code, placed at the edge of the windscreen, is an important car security element.

The car can be identified based on this plate.

3. Front fog lamps with the “Corner” function contribute to safer turning or manoeuvring with the car in poorly lit areas at speeds of up to 40 kph. The “Corner” function means that the left or right fog lamp turns on automatically depending on the steering wheel position and side indicators.

4. The parking sensor with its four sensors located in the rear bumper will make reversing when parking easier. Whenever you get too

close to another car or any other obstacle, you are warned with an acoustic alarm.

5. The Easybob Maxi child seat, included in the Škoda Genuine Accessories range, is fitted to the front or rear seat, always facing the rear of the car. If placed on a front seat, the passenger airbag must be deactivated.

6. The third headrest for the rear seat minimises head and neck injuries for the middle rear seat passenger.

7. Driver and passenger airbags are one of the basic elements of safety equipment.

8. Side airbags, which protect the driver and passenger in the event of a side collision, are conveniently concealed in the backrests of the front seats.

9. Head airbags, when activated, create a protective wall which can reduce the effect of the impact for both the front and rear seat passengers.

10. The ESP (Electronic Stability Programme) maintains the car's stability and control under any circumstances, including emergencies. The ESP coordinates and controls the activity of other systems such as the ABS (Anti-lock Braking System) and the ASR (Anti-Slip Regulation).

11. Tyre Pressure Monitoring (TPM) works together with the ABS sensors, as an under-inflated tyre has a different revolution speed. A control light on the instrument panel as well as an acoustic alarm warn the driver of the discrepancy.

12. Locking the car from the inside is possible in models with central locking. It is a simple feature to protect your belongings when stopping at traffic lights or in slow city crawls.

13. Passenger seat airbag deactivation allows you to place a child seat on the front passenger seat.

space & comfort

Make every day a Sunday. Spend an hour in the bathtub. Maybe two. Walk the dog. Stretch yourself out on a hammock. Take a nice, unwinding, relaxing nap, just like the one you took at school. Go to the nearest lake and dive in. Invite friends over for dinner. And invite their friends too. For dessert, go for a comfortable drive in your Fabia Combi.

10.

11.

12.

“Comfort and convenience”

Of course, ample space is the prerequisite of comfort in any car. Besides, there are many other features that make a car even more comfortable.

1. The dashboard respects ergonomic principles consistently. This means that the driver's workplace is organised with respect to maximum comfort, safety and convenience.

2. The electric sunroof enhances the pleasure of driving on a warm, sunny day.

3. The reading lamp is available to rear seat passengers. Its illumination doesn't distract the driver, so you can continue to read comfortably.

4. Storage compartments on the passenger side are provided in various designs as either open or covered, depending on the equipment

version. The lower lockable box can serve as a small refrigerator in the air-conditioned versions.

5. Storage pockets in the front seat backrests provide a place for rear seat passengers to keep the useful things always at hand.

6. An adjustable armrest between the front seats houses a convenient 1.2l storage box.

7. Make-up mirrors in the sun visors on both the driver and passenger sides can prove helpful just before that important meeting.

8. The drawer with a tilting lid under the driver and passenger seats is another convenient storage area to equip your car with.

9. A 1.5l bottle holder is available to both the driver and the passenger, as it is part of the

storage compartments in the panelling of both front doors.

10. The storage compartments in the rear door panelling can be used by young passengers to store their secrets during long trips.

11. The height-adjustable driver and passenger seats are both comfortable and useful.

12. The sunglasses compartment is located in the ceiling above the rear-view mirror. It is within easy reach for both the driver and the passenger.

The 100% silk tie is a perfect complement to the driver, for whom the car is an expression of their lifestyle.

8.

9.

10.

11.

12.

13.

1., 2., 3. The split (60 : 40) foldable rear seat allows you to adjust the car interior to the situation. Folding one or both seats gives you room in the car to transport a number of long objects, while still having seating space in the rear. Folding all the seats provides you with 1,460 litres of storage space.

4. The luggage compartment offers an exceptional amount of space in the standard interior arrangement. Even with the car fully laden, you have 480 litres at your disposal for luggage. These parameters are exceptional not only in the small car class, but also comparable with upper class vehicles as well.

5. The luggage compartment roller cover can be released even with both your hands full. Just press the portion of the cover bar marked "press" with your elbow, and the cover rolls in automatically.

6. The Net Programme consists of three nets to hold your sports gear etc. securely in place even when you take a winding road.

7. The flexible partition in the luggage compartment is also there to help you hold in place all sorts of objects. Together with the removable partitions placed behind the wheel arches, they form three practical compartments ensuring safe transportation of the cargo.

8. The interior bicycle holder (right side of the loading edge) allows you to take two bicycles in the interior with the rear seats folded.

9., 10. The dividing net, used to separate the cabin from the luggage compartment, is usually fixed to the rear seats. It can be fixed behind the front seats if needed.

11. The folding hooks placed on both sides of the luggage compartment further increase the car's functionality.

12. The 12V outlet, fitted in all Fabia Combi cars, is covered with a safety lid.

13. Luggage compartment illumination will always make it easy for you to see what you are carrying.

The man's blue-grey cotton T-shirt will show at first sight that you are a fan of the Fabia Combi. The lady's combination cotton-lycra T-shirt will perfectly compliment the female driver especially in the Satin Grey metallic Fabia Combi.

equipment

It's time to make some decisions. Get some new plants. Replace the old coffee mugs. Buy new tennis balls. And a few for your dog. Surprise your family with gifts. And get some for you too. Change the bed sheets. Go for a long, romantic drive on your anniversary. But first, don't forget the anniversary. And even if you do, make it up to her with the new Fabia Combi.

With Škoda Genuine Accessories, your car can be made more personal and practical. Škoda authorised partners will inform you about the entire range of accessories.

1. The styling kit is offered to customers who want a sportier look for their car. It makes the new Fabia Combi even more impressive as it gains a look of wild but healthy aggression. The styling kit comprises a front bumper spoiler, a rear bumper diffuser, a decorative exhaust pipe end piece, and a roof spoiler.

2. The transverse roof rack is the base for fitting bicycle and ski carriers or roof boxes. Apart from its practical functionality, it is distinguished by its elegant look.

3. Decorative door sill covers enhance the car's appeal and protect the door sills from damage.

4. The portable navigation device ViaMichelin X-970 T, equipped with maps of the majority of European countries, is

an example of the aptly named "personal navigation systems". It comes with a holder that fits to the dashboard. It can be easily removed from the holder and used outside your car. Installation requires a modifications package that's available as an optional extra.

5. The trunk grille is practical equipment for dog owners and indispensable if you wish to use the entire luggage compartment capacity. The grille prevents any penetration of the transported objects into the passenger area.

General information

ŠKODA SERVICE

Dear Škoda vehicle owners,
We offer you numerous reasons for visiting your authorised Škoda service partner.

Quality of the service network and personnel

The types of technology we integrate into your vehicle continue to become more and more advanced; therefore, our service personnel must adequately improve their professional knowledge. Authorised service centre workers regularly receive technical and also non-technical training provided by the manufacturer in order to obtain the latest knowledge for their work.

Quality of the service level monitoring system

Our goal is to meet your requirements in the best possible way; that's why we introduced our new service level monitoring system in our whole sales network – from the manufacturer up to individual service partners. It guarantees a high level of customer care and repair processes.

Quality of the repair level and customer care

Anytime your Škoda vehicle "calls" for service, call us and we will gladly schedule your individual appointment. That will give us enough time for the best possible care. Your Škoda vehicle needs and requires state-of-the-art types of technology. Only technological procedures specified by the manufacturer and the most advanced workshop equipment and diagnostic systems are able to guarantee the flawless operation and reliability of your vehicle.

Our work philosophy is based on the fair and transparent treatment of our customers. Following that philosophy, we set standard time units for vehicle repairs and maintenance. Only this mechanism allows us to provide you with a good repair price estimate. Our authorised Škoda service partners will provide you with a repair price estimate before the work starts. As a result of that, you are informed about the repair price in advance. If your vehicle needs more care than originally expected, our authorised Škoda service partners will immediately inform you and arrange further steps with you so that you always have the costs under control.

A comprehensive offer of services

From time to time your Škoda vehicle needs our expert care, either during its regular maintenance, any repairs or if you wish to purchase or borrow Škoda Genuine Accessories. We are ready for all these situations and we will always take care of both your vehicle and your mobility.

Your authorised Škoda service partner will gladly inform you about our specific offers.

ŠKODA GENUINE ACCESSORIES

Genuine accessories make every vehicle unique, giving it its own style. The Škoda Fabia Combi comes with very extensive basic equipment; however, some of the additional items can only be purchased as Škoda Genuine Accessories. These items include, for example, child safety seats, roof rails, mobile phone adapters and alloy wheels. The extra equipment offer also extends to mechanical security items and a whole series of items increasing the vehicle's utility value and individuality. Our catalogue of Fabia equipment contains more detailed information on the Škoda Genuine Accessories range.

ŠKODA GENUINE PARTS

Škoda Genuine Parts are identical to those used during the assembly of Škoda vehicles. The vehicle manufacturer knows best which part is intended for which functionality and the required parameters it needs to meet unconditionally for the car to function properly.

Safety

Every vehicle component and part has its own purpose and some of them directly determine the safety of the car's occupants. Our care for safety is proven in, for example, body structure, airbags, safety belts and most importantly in the brake system. The lives of the people in and around the car depend on the quality and operating efficiency of the brakes, especially under extreme conditions.

Availability

Thanks to the large network of authorised Škoda service partners, all Škoda drivers can be assured that they will be able to get the parts they need for their car. Škoda Auto offers a comprehensive range of parts and equipment items that are used in the vehicle's production, and does not merely focus on high-turnover parts. The supply of Škoda Genuine Parts is provided even after the relevant vehicle model is discontinued, and not just for the period specified by law: indispensable components for the operation of the car are supplied to the market for at least 15 years after the discontinuation, car equipment components are supplied to the market for at least 10 years after the discontinuation and components of door lining and carpets are supplied to the market for at least 8 years after the discontinuation.

Top quality

To verify quality parameters, the development department maintains an extensive testing facility including a test circuit with extreme polar and desert conditions, as well as material testing laboratories of the quality control department. Thanks to use of first-rate materials and technologies, Škoda Genuine Parts ensure safe and carefree driving. Precise alignment guarantees replacement of worn parts without unnecessary complications.

Long life

The use of first-rate materials and top production technologies in the production of Škoda Genuine Parts ensure their maximum reliability and long life.

Original technical solutions

The knowledge gained in production and operation is continuously reflected in the search for new technical solutions aimed at obtaining a truly first-rate product, which will meet the customer's requirements.

Legislative requirements and certification

All Škoda Genuine Parts meet the legislative requirements and are approved by Škoda Auto on the basis of meeting stringent criteria. This way the customer obtains a guarantee that the components installed in their vehicle will be reliable, functional and safe.

Protection of the environment

The Škoda Genuine Parts range includes exchange parts whose production does not burden the environment with waste, excess heat and water pollution to a high degree. Returned parts and aggregates are not discarded but modified for re-use, thus re-utilising a great part of the work and energy invested in the parts during their manufacture.

INFORMATION ON THE INTERNET

Information is available at www.skoda-auto.com to assist you in deciding which vehicle suits your needs thanks to the detailed descriptions and photographs of all our models. Our Configuration program will let you try various combinations of standard equipment, engine, paint colour, interior, and extra equipment to make sure your new vehicle accurately meets your requirements. This program will also assist you with the calculation of optimum monthly payments for vehicle financing and the selection of a suitable dealer.

ŠKODA FINANCE

If you select a new Škoda Fabia Combi vehicle, ŠkoFIN will assist you with financing it. The ŠkoFIN Company offers programs both for individuals and legal entities. Our Škoda Finance brand product line offers both lease and loan financing. You can contact one of our authorised Škoda partners to arrange and sign an agreement and to learn more about our product offer or the convenient special offers from ŠkoFIN. These are time-limited; however, they bring very unique and interesting benefits.

FLEET SALES

Whether your car fleet is small or large or whether you are a customer from the business or public sector, Škoda Auto and its authorised dealer network are here for you. We offer products and services tailored to your business and financial needs, including top-quality customer care, a portfolio of services corresponding to the specific requirements of corporate customers and a high quality of cars, accessories and maintenance services, which are a guarantee of low operating and ownership costs of your car fleet.

One of the most important goals of Škoda Auto is the development and production of products that are as environmentally friendly as possible throughout their life cycle phases, placing principal emphasis on the selection of recyclable materials. Our Škoda cars are manufactured using progressive types of technology in modern production facilities that meet the strictest criteria. Anticorrosive protection of the cars' painted parts is based exclusively on lead-free cataphoresis (KTL) and water-soluble paints.

Our company strategy includes limiting fuel consumption and emissions. As a result, the engines of Škoda Auto meet the current emission regulations. We also offer diesel engines with Diesel Particulate Filters (DPF). All products made by Škoda Auto adhere to the laws and regulations concerning the protection of soil and water. As a result of these activities, Škoda cars meet technical, safety, quality and environmental requirements. Škoda Auto contributes to the preservation of a clean environment and provides mobility and comfort to its customers.

The environmental logo expresses Škoda Auto's awareness of responsibility for, and attempts at, the sustainable development of the company and a friendly approach to life and nature.

Some models in this catalogue are shown fitted with extra equipment not necessarily included in the standard equipment. All details of technical specifications, design, equipment, materials, guarantees and appearance were accurate at the time of going to print. However, the manufacturer reserves the right to make any changes

(including changes of technical parameters or individual model equipment). Please consult your authorised Škoda partner for further details on standard and extra equipment, current prices and delivery terms and conditions. This catalogue was printed on cellulose paper which was bleached without using chlorine. The paper is 100% recyclable.
